Richard Small, CEO  
Angiology Corporation of America  
104 Woodmont Blvd. #404  
Nashville, TN 37205

Dear Richard:

On behalf of the Alexian Brothers Hospital Network I would like to express what a positive experience it has been to work with Angiology Corporation of America in developing our dynamic community screening program for stroke, heart attack and peripheral vascular disease.

With the advanced screening technology provided by your organization, we have been able to exceed our community screening expectations. In just a few short months we are already screening over 500 participants per month and are poised to launch our second screening team. As the exclusive provider of Angioscreen in the Chicago area we have been quickly able to become the market leader in stroke prevention.

Angioscreen has been instrumental in identifying those in our communities that are at risk for a life threatening vascular event. In fact, we have been able to steer many of the participants to our AlexianConnects physician appointment and referral program, enabling them to begin an ongoing relationship with our health system.

From the high quality marketing materials to the responsive operational support we have been more than pleased with our partnership and look forward to continuing our screening endeavors with Angiology Corporation of America.

Sincerely,

Penny Davis  
Vice President  
Alexian Brothers Hospital Network
